

bruunmunch  / *Pump / specs*

Description

The central idea behind the Pump sofa is to make an interpretation of a modern sofa, a lounge sofa with carefully chosen proportions, very comfortable and no decorative frills.

Pump sofa is bulky, soft and welcoming, and the high quality inner workings ensure lasting comfort seats.

The arms offer as much support as the rear of the system - which provides opportunities for a variable style use. Thanks to its modular structure, the Pump sofa shape can be defined personally and changed at any time.

Construction

Frame is constructed from European plywood - a tough, light and durable solution.

Outside and inside frame sections covered in masonite.

Seat frame build from solid pine mounted with hardened steel springs to ensure high comfort and durability. Foam construction is built entirely from EcoTex labeled fire retardant cold cured foam in different qualities. We use only high end and high density foam qualities for comfort and durable shape for several years. Seat quality, top layer of arms and back construction are made from 40 kg. foam. Back and arm rests are padded with heavy layer of 35 kg. foam. Heavy shrouds made from 27 kg. foam.

All parts are covered in a thick layer of polyester wadding. Pump are upholstered with top quality fabrics from high end brands, and also available in leather.

4 adjustable legs on each module. Modules are held together by strong metal fittings.

Pump is available as fixed sofas or modular configurations.

Designer

Peter Barreth

As a 3rd generation upholsterer, Peter has furniture in his blood.

The style is clean and uncompromising strongly rooted in traditional techniques and craftsmanship influenced by the strong danish design decade - the 1960's.
